

The types of eye protection required depend on the hazards present in the workplace. When working in areas where particles, flying objects, or dust can be present, safety glasses with side protection (side shields) must be worn.

Goggles are required when working with chemicals, and special-purpose safety glasses, goggles, face shields, or helmets are required when working near hazardous radiation like welding, lasers, or fiber optics.

Genesis® Safety Glasses

Features dual 9-base curve, wraparound lenses for peripheral protection, flexible nosepiece fingers for reduced slippage, elastomer browguard for impact protection, and adjustable spatulite temples and lens inclination. Impact-resistant polycarbonate lenses block 99.9% of UVA and UVB radiation. Lenses available with Uvextreme® anti-fog coating, Ultra-dura® hardcoat, and Infra-dura® welding tint. Lifetime frame guarantee. Meets ANSI Z87.1+ High Impact and Military Vo Ballistic Test for Impact, which is 7x greater than ANSI requires. Certified to CSA Z94.3 standards. Made in USA, mirrored lenses made in China. Standard pack 10/Bx.
